

TechMart Electronics - Complete Product Catalog

The following catalog contains the primary consumer smart-home products offered by TechMart Electronics. This document is intended for the AI knowledge base used by the customer support system.

#	Product	Category	Key Features
1	Smart Speaker X1	Audio	AI voice assistant, Bluetooth 5.3, Wi-Fi, Dolby audio
2	Smart Speaker Mini	Audio	Compact smart speaker for bedrooms
3	Smart Speaker Pro	Audio	Premium audio with subwoofer
4	Smart Camera Indoor	Security	1080p indoor security camera
5	Smart Camera Outdoor	Security	Weather-resistant outdoor camera
6	Smart Doorbell	Security	Video doorbell with motion alerts
7	Smart Display	Display	10-inch smart display with assistant
8	Smart Plug	Automation	Remote appliance control
9	Smart Bulb	Lighting	RGB smart LED lighting
10	Smart Switch	Automation	Wi-Fi wall switch
11	Smart Thermostat	Climate	Temperature automation
12	Smart Lock	Security	Fingerprint and app-controlled lock
13	Smart Smoke Detector	Safety	Smoke and CO alerts
14	Smart Water Sensor	Safety	Leak detection
15	Smart Robot Vacuum	Cleaning	AI mapping and auto cleaning
16	Smart Air Purifier	Health	HEPA filtration with app
17	Smart Fan	Climate	Voice-controlled ceiling fan
18	Smart Garage Controller	Automation	Remote garage door access
19	Smart Power Strip	Power	Individual socket automation
20	Smart Home Hub	Hub	Central controller for all devices

Smart Speaker X1

Smart Speaker X1 is part of the TechMart smart ecosystem. It supports mobile app integration, firmware updates, warranty registration, and customer support. Primary highlights: AI voice assistant, Bluetooth 5.3, Wi-Fi, Dolby audio. Typical use cases include home automation, energy efficiency, remote monitoring, and improved user convenience. This product is compatible with the TechMart Home mobile application and selected third-party smart-home platforms.

Smart Speaker Mini

Smart Speaker Mini is part of the TechMart smart ecosystem. It supports mobile app integration, firmware updates, warranty registration, and customer support. Primary highlights: Compact smart speaker for bedrooms. Typical use cases include home automation, energy efficiency, remote monitoring, and improved user convenience. This product is compatible with the TechMart Home mobile application and selected third-party smart-home platforms.

Smart Speaker Pro

Smart Speaker Pro is part of the TechMart smart ecosystem. It supports mobile app integration, firmware updates, warranty registration, and customer support. Primary highlights: Premium audio with subwoofer. Typical use cases include home automation, energy efficiency, remote monitoring, and improved user convenience. This product is compatible with the TechMart Home mobile application and selected third-party smart-home platforms.

Smart Camera Indoor

Smart Camera Indoor is part of the TechMart smart ecosystem. It supports mobile app integration, firmware updates, warranty registration, and customer support. Primary highlights: 1080p indoor security camera. Typical use cases include home automation, energy efficiency, remote monitoring, and improved user convenience. This product is compatible with the TechMart Home mobile application and selected third-party smart-home platforms.

Smart Camera Outdoor

Smart Camera Outdoor is part of the TechMart smart ecosystem. It supports mobile app integration, firmware updates, warranty registration, and customer support. Primary highlights: Weather-resistant outdoor camera. Typical use cases include home automation, energy efficiency, remote monitoring, and improved user convenience. This product is compatible with the TechMart Home mobile application and selected third-party smart-home platforms.

Smart Doorbell

Smart Doorbell is part of the TechMart smart ecosystem. It supports mobile app integration, firmware updates, warranty registration, and customer support. Primary highlights: Video doorbell with motion alerts. Typical use cases include home automation, energy efficiency, remote monitoring, and improved user convenience. This product is compatible with the TechMart Home mobile application and selected third-party smart-home platforms.

Smart Display

Smart Display is part of the TechMart smart ecosystem. It supports mobile app integration, firmware updates, warranty registration, and customer support. Primary highlights: 10-inch smart display with assistant. Typical use cases include home automation, energy efficiency, remote monitoring, and improved user convenience. This product is compatible with the TechMart Home mobile application and selected third-party smart-home platforms.

Smart Plug

Smart Plug is part of the TechMart smart ecosystem. It supports mobile app integration, firmware updates, warranty registration, and customer support. Primary highlights: Remote appliance control. Typical use cases include home automation, energy efficiency, remote monitoring, and improved user convenience. This product is compatible with the TechMart Home mobile application and selected third-party smart-home platforms.

Smart Bulb

Smart Bulb is part of the TechMart smart ecosystem. It supports mobile app integration, firmware updates, warranty registration, and customer support. Primary highlights: RGB smart LED lighting. Typical use cases include home automation, energy efficiency, remote monitoring, and improved user convenience. This product is compatible with the TechMart Home mobile application and selected third-party smart-home platforms.

Smart Switch

Smart Switch is part of the TechMart smart ecosystem. It supports mobile app integration, firmware updates, warranty registration, and customer support. Primary highlights: Wi-Fi wall switch. Typical use cases include home automation, energy efficiency, remote monitoring, and improved user convenience. This product is compatible with the TechMart Home mobile application and selected third-party smart-home platforms.

Smart Thermostat

Smart Thermostat is part of the TechMart smart ecosystem. It supports mobile app integration, firmware updates, warranty registration, and customer support. Primary highlights: Temperature automation. Typical use cases include home automation, energy efficiency, remote monitoring, and improved user convenience. This product is compatible with the TechMart Home mobile application and selected third-party smart-home platforms.

Smart Lock

Smart Lock is part of the TechMart smart ecosystem. It supports mobile app integration, firmware updates, warranty registration, and customer support. Primary highlights: Fingerprint and app-controlled lock. Typical use cases include home automation, energy efficiency, remote monitoring, and improved user convenience. This product is compatible with the TechMart Home mobile application and selected third-party smart-home platforms.

Smart Smoke Detector

Smart Smoke Detector is part of the TechMart smart ecosystem. It supports mobile app integration, firmware updates, warranty registration, and customer support. Primary highlights: Smoke and CO alerts. Typical use cases include home automation, energy efficiency, remote monitoring, and improved user convenience. This product is compatible with the TechMart Home mobile application and selected third-party smart-home platforms.

Smart Water Sensor

Smart Water Sensor is part of the TechMart smart ecosystem. It supports mobile app integration, firmware updates, warranty registration, and customer support. Primary highlights: Leak detection. Typical use cases include home automation, energy efficiency, remote monitoring, and improved user convenience. This product is compatible with the TechMart Home mobile application and selected third-party smart-home platforms.

Smart Robot Vacuum

Smart Robot Vacuum is part of the TechMart smart ecosystem. It supports mobile app integration, firmware updates, warranty registration, and customer support. Primary highlights: AI mapping and auto cleaning. Typical use cases include home automation,

energy efficiency, remote monitoring, and improved user convenience. This product is compatible with the TechMart Home mobile application and selected third-party smart-home platforms.

Smart Air Purifier

Smart Air Purifier is part of the TechMart smart ecosystem. It supports mobile app integration, firmware updates, warranty registration, and customer support. Primary highlights: HEPA filtration with app. Typical use cases include home automation, energy efficiency, remote monitoring, and improved user convenience. This product is compatible with the TechMart Home mobile application and selected third-party smart-home platforms.

Smart Fan

Smart Fan is part of the TechMart smart ecosystem. It supports mobile app integration, firmware updates, warranty registration, and customer support. Primary highlights: Voice-controlled ceiling fan. Typical use cases include home automation, energy efficiency, remote monitoring, and improved user convenience. This product is compatible with the TechMart Home mobile application and selected third-party smart-home platforms.

Smart Garage Controller

Smart Garage Controller is part of the TechMart smart ecosystem. It supports mobile app integration, firmware updates, warranty registration, and customer support. Primary highlights: Remote garage door access. Typical use cases include home automation, energy efficiency, remote monitoring, and improved user convenience. This product is compatible with the TechMart Home mobile application and selected third-party smart-home platforms.

Smart Power Strip

Smart Power Strip is part of the TechMart smart ecosystem. It supports mobile app integration, firmware updates, warranty registration, and customer support. Primary highlights: Individual socket automation. Typical use cases include home automation, energy efficiency, remote monitoring, and improved user convenience. This product is compatible with the TechMart Home mobile application and selected third-party smart-home platforms.

Smart Home Hub

Smart Home Hub is part of the TechMart smart ecosystem. It supports mobile app integration, firmware updates, warranty registration, and customer support. Primary highlights: Central controller for all devices. Typical use cases include home automation, energy efficiency, remote monitoring, and improved user convenience. This product is compatible with the TechMart Home mobile application and selected third-party smart-home platforms.
